Surgical Fee Information: (We Do NOT accept credit cards)

Surgical Fee Includes:
-Pre-op evaluation by Dr. Mota.
-Chest X-ray
-EKG
-Cardiovascular evaluation by our chief cardiologist.
-Anaesthesia fee
-Surgical staff fees
-Overnight stay in the clinic
-First compressive garment
-Free of charge follow-ups by Dr. Mota.
-Post-op medication that includes antibiotics, blood thinners and pain meds.
-Pre-op laboratory blood and urine tests.
-Pre-op evaluation by our chief anaesthesiologist is not included. It is 50US
-Due to the COVID-19 Pandemic, all patients must be evaluated by our Lung Specialist. This is 150US.

* Transportation and Airport pick-up is not included but can be arranged.

*Recovery House fee is not included but can also be arranged.

*Surgery Insurance is obligatory. The amount is stated in our quote. If the patient is unaccompanied, a private nurse is needed. Nurses fees may vary. Please ask our assistant for pricing.

* In order to assure vacancy for your procedure our clinic requests a deposit of 300 US. This is the only way we can make sure you don't loose your surgery date, plus it is then easier to move your date if necessary. This money will be deducted from the initial quote.

* The initial quote for the procedure is only valid for 45 days. After this

Important Information:

Patients should send a recent Complete Blood Count as soon as possible after contacting us, in order to make sure there is no underlying anaemia (low haemoglobin levels) that would contraindicate surgery. If so patients, should take the recommended supplements and/or see a specialist prior to traveling.

Patients with medical conditions will need additional testing and/or an evaluation by a specialist before qualifying for surgery. These tests are not included in our quote. Prices will vary depending on the patient's condition.

Due to the COVID Pandemic, we recommend patients bring a recent (2 weeks) negative PCR test in order to make sure they are negative before traveling and to make the pre-op lab work go faster. This does not exclude additional Covid testing here. ALL patients will get tested for COVID-19 here. Patients that do not bring a recent PCR test will have to get The PCR test here and this may prolong pre-op stay. Therefore surgery will be postponed until the negative results are in.
